**SUBJECT: Construction Work at Chickamauga Lock, TRM 471.00**

Horizontal Post Tensioning Construction work will be occurring on the left descending lock wall for the existing Chickamauga Lock in the late August 2008 to early September 2008 timeframe. This work will require a 3-day closure of the lock to commercial tows and possibly recreational traffic due to a work platform installation on the chamber side of the lock wall. Recreational craft may or may not be locked during this 3-day closure period as site safety considerations warrant. Upon contract award and receipt of a contractor schedule, a follow-up navigation notice will be issued identifying the exact time and day this closure will commence.

Additional comments or questions may be directed to the Lockmaster, Mr. Matt Emmons @ (423) 875-6230

JEFEREY D. ROSS  
Chief, Navigation Branch  
Operations Division
